

## ABSTRAK

Ahmad Agung Parfiyanto. “Kesiapan Kerja Aspek Sikap Siswa Kelas XII Program Keahlian Teknik Sepeda Motor SMK IT Al – Furqon Sanden”. Skripsi. Pendidikan Teknik Otomotif. FKIP, Universitas Muhammadiyah Purworejo. 2025

Penelitian deskriptif kuantitatif ini bertujuan untuk mengetahui kesiapan kerja aspek sikap siswa kelas XII Program Keahlian Teknik Sepeda Motor SMK IT Al – Furqon Sanden. Permasalahan utama yang dikaji dalam penelitian ini adalah bagaimana kecenderungan tingkat kesiapan kerja aspek sikap siswa kelas kelas XII Program Keahlian Teknik Sepeda Motor SMK IT Al – Furqon Sanden jika ditinjau dari penguasaan informasi dunia kerja, kemandirian belajar siswa dan disiplin kerja siswa dalam praktik mata diklat produktif.

Subyek penelitian ini adalah siswa kelas kelas XII Program Keahlian Teknik Sepeda Motor SMK IT Al – Furqon Sanden dengan jumlah sampel 15 siswa. Teknik pengumpulan data dilakukan melalui metode *random sampling* dengan tingkat kesalahan 5%. Adapun instrumen penelitian yang dipakai yaitu dengan menggunakan kuesioner atau angket. Uji validitas instrumen penelitian menggunakan teknik korelasi *product moment* dan uji reliabilitas instrumen menggunakan *alpha cronbach*. Penelitian ini dilakukan dengan metode deskriptif analitis. Teknik analisis data yang digunakan adalah perhitungan persentase.

Hasil penelitian mendapatkan bahwa kecenderungan tingkat kesiapan kerja aspek sikap siswa kelas kelas XII Program Keahlian Teknik Sepeda Motor SMK IT Al – Furqon Sanden ditinjau dari penguasaan informasi dunia kerja berada pada kategori baik dengan nilai persentase sebesar 79%. Ditinjau dari kemandirian belajar siswa, kecenderungan tingkat kesiapan kerja aspek sikap siswa berada pada kategori sedang (cukup) dengan nilai persentase sebesar 93%.

**Kata kunci:** Kesiapan Kerja, Teknik Sepeda Motor

## **ABSTRACT**

*Ahmad Agung Parfiyanto. "Work Readiness in Terms of Attitude among 12th Grade Students of the Motorcycle Engineering Program at SMK IT Al-Furqon Sanden." Thesis. Automotive Engineering Education. Faculty of Teacher Training and Education, Universitas Muhammadiyah Purworejo. 2025. This quantitative descriptive study aims to determine the work readiness in terms of attitude among 12th grade students of the Motorcycle Engineering Program at SMK IT Al-Furqon Sanden. The main issue examined in this research is the tendency level of work readiness in terms of attitude, observed through students' mastery of labor market information, independent learning, and work discipline during productive training practices.*

*The subject of this research consists of 15 students from the 12th grade Motorcycle Engineering Program at SMK IT Al-Furqon Sanden. Data collection was conducted using a random sampling method with a 5% margin of error. The research instrument used was a questionnaire. The validity of the instrument was tested using the product-moment correlation technique, while its reliability was tested using Cronbach's alpha. This research applied a descriptive analytical method, and data analysis was conducted using percentage calculations.*

*The results showed that the tendency level of work readiness in terms of attitude, based on students' mastery of labor market information, was in the "good" category with a percentage score of 79%. In terms of independent learning, the tendency level of work readiness in terms of attitude was in the "moderate" (adequate) category with a percentage score of 93%.*

**Keywords:** *Work Readiness, Motorcycle Engineering*
