**Keywords :***Implementation, Musixmatch, Improve, Vocabulary Mastery*

The objectives of this study were to find the improvement of students' vocabulary mastery, to know the implementation of musixmatch, and to describe the students' response after being taught by using musixmatch at the tenth grade of Madrasah Aliyah Negeri Gombong in academic year 2014/2015

This research was conducted at Madrasah Aliyah Negeri Gombong in April until May 2015. This research is called classroom observation research. In this research, the researcher took 30 students at the tenth grade of IPA 3 Class in second semester of Madrasah Aliyah Negeri Gombong. The researcher observed the teacher taught musixmatch as a media in the class. The researcher then analyzed the data. The method of research is qualitative research.

The result of the mean score without using musixmatch is 55.5; meanwhile, the mean score after using musixmatch is 88.5. The implementation of musixmatch could make the students interest in learning vocabulary. Then the students response was good toward teaching process by musixmatch.

Based on the result of the research finding, the researcher concludes that a musixmatch is well implemented and useful to improve students' vocabulary mastery.
